## PROFESSIONAL EXPERIENCE

**Software Engineer**                          **Borndigital Ltd** Bengaluru, India | June 2020 - Present
- In this role, I manage Jira & Git and provide technical solutions for new implementations & existing issues in the application.
- Learn about **XEP** and solve the issues of key fetching, contact subscription, conversations etc.
- In this company, I learned about optimizing the application using threadpool, eventbus and use of ndk.
- Direct communication with client for new features, issues and explain them the possibility and scope.
- Complete the milestone within proper time and provide builds.
- Design & Develop features like backup using AWS amplify, subscription for using the app etc.
- Check firebase regularly for crashes and exceptions and assign those to related developer.

**Senior Software Engineer**                    **Scketch Digital Solutions** Bengaluru, India | Dec 2019 - May 2020

- In this company, I was only android developer and I used to manage interns and guide them regarding further development.
- It was a new product so created app architecture from scratch using MVVM with clean and Dagger2, Navigation Components etc.
- Integrated chatbot(Google dialog flow) & OCR.
- Integrated firebase crashlytics and remote config.
- Added location based services to get the current location of the user.
- Design & build apps without any documents and used dummy apis.

**Software Engineer**                    **Tatvasoft** Ahmedabad, India | Jul 2019 - Nov 2019
**Associate Software Engineer**                    **Tatvasoft** Ahmedabad, India | Jul 2018 - Jun 2019
**Trainee**                    **Tatvasoft** Ahmedabad, India | Jan 2018 - Jun 2018

- I joined this company as a fresher. During the training i learned how to implement best UI/UX and work with existing code.
- In this company, I learned how to be a team player and work with different teams in critical situations.
- I had responsibilities of completing the tasks & features within the deadline and report to Team leader.
- I used to create smooth applications with the best UI/UX experience from provided designs.
- I used to communicate with backend teams to design API params as per requirement in Android and iOS.
- I needed to work closely with design teams and provide them suggestion for improving the designs based on material components.
- Worked with online & offline applications providing smooth user experience.
- Developed full & partial codes for applications.
- I used to maintain the efficiency of all developed applications.
- Handle client calls and understand their requirements, explain them regarding the flow of development.
- Tested applications on simulators and on different actual devices.
- Check firebase regularly for assigned projects.
